EDUCATION

Brooklyn College, CUNY

B.S. Information Systems & B.S. Business Management, Minor: Computer Science

Relevant Coursework: Data Structures, Algorithms, Database Systems, Operating Systems, OOP, Systems Analysis | CodePath:

Intermediate & Advanced Technical Interview Prep & Applied AI Engineering

Brooklyn, NY

Expected: December 2026

Kingsborough Community College

Associate of Arts, Liberal Arts

Brooklyn, NY

August 2021 – May 2023

EXPERIENCE

CIS Peer Mentor /Teaching Assistant, Computer Science Department

Brooklyn College

Feb 2026 – Present

Brooklyn, NY

- Evaluated and Tutored 60+ students' Java assignments for via CodeLab, iterating on feedback strategy until grade outcomes measurably improved by an average of 35% across the class.
- Tracked recurring error patterns across submissions and coordinated with instructors to adjust lecture emphasis, reducing compounding misconceptions class-wide.

Logistics Associate

The Kitpak

Aug 2024 – May 2025

- Diagnosed a bottleneck in the fulfillment workflow and restructured the picking and packing process, resulting in faster turnaround on high-volume days without sacrificing accuracy.
- Coordinated international orders across Windows, macOS, and Shopify, catching cross-platform discrepancies before they reached the shipment stage.

IT Helpdesk Technician

Kingsborough Community College

Aug 2022 – May 2023

Brooklyn, NY

- Resolved 20–40 hardware and software support tickets daily for a 20,000+ person campus, maintaining same-day close rates and keeping escalations low.
- Traced recurring Microsoft Outlook failures to a shared misconfiguration pattern and applied a systematic fix, eliminating repeat tickets across affected accounts.

PROJECTS

Calisigh | Desktop App | React, Tauri, Rust, Java (Spark), JavaScript

<https://github.com/Marqed4/Calisigh>

2025

- Architected a multi-layer desktop calendar: React frontend, Tauri/Rust shell for OS integration, and a Java Spark REST backend; packaged as a Windows installer (v1.1.5) distributed to 5 external users.
- Embedded an Ollama 3.2 local LLM as a context-aware scheduling assistant, delivering AI features entirely on-device with zero external API calls or data transmission.

Diva FFMPEG | Rust TUI Wrapper | Rust, Ratatui, Charm-Lipgloss

<https://github.com/Marqed4/DivaFFMPEG>

2026

- Text/ terminal user interface that uses rust libraries and ascii art to provide a user-friendly interaction with FFMPEG.
- Users can convert, merge, trim, compress, and add filters to various media files.

Popular Vote | Full-Stack Web App | React, Node.js, PostgreSQL, Socket.io, Supabase, Gemini API, Google OAuth

<https://github.com/Marqed4/PopularVote>

2026

- Built a live Q&A platform with real-time WebSocket delivery and role-based host/participant architecture; validated stability under load with 40 simultaneous users joined via QR code.
- Integrated Gemini Flash 2.5 to cluster questions by semantic theme, reducing duplicate responses; coordinated development across a 3-person Agile team mentored by a senior Shopify engineer.

SolveSudoku | Full-Stack Web App | React, Vite, Python, Flask, Gemini API, PIL

<https://sudoku.marqed.it>

2026

- Developed a browser-based Sudoku platform with puzzle generation, constraint-based solving, validation, and an AI hint system; built a photo-to-puzzle pipeline using Gemini Flash 2.5 and PIL.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Rust, SQL

Databases: PostgreSQL, Supabase

Frameworks: React, Node.js (Express), Flask, Tauri, Spark Java

Tools: Git, GitHub, VS Code, Maven, Cargo, Vite, npm
