

EDUCATION

Brooklyn College, CUNY

Brooklyn, NY

M.S. Computer Science: Concentration in Information Systems

Expected: December 2028

B.S. Information Systems & B.S. Business Management, Minor: Computer Science

Expected: December 2026

Relevant Coursework: Data Structures, Algorithms, Database Systems, Operating Systems, OOP, Systems Analysis

CodePath: Intermediate and Advanced Technical Interview Prep Certification, Applied AI Engineering Certification

Kingsborough Community College

Brooklyn, NY

Associate of Arts, Liberal Arts

May 2023

EXPERIENCE

CIS Peer Mentor / Teaching Assistant, Computer Science Department

Feb 2026 – Present

Brooklyn College

Brooklyn, NY

- Evaluated and tutored 60+ students on Java assignments via CodeLab, iterating on feedback strategy until grade outcomes improved by an average of 35% across the class.
- Tracked recurring error patterns across submissions and coordinated with instructors to adjust lecture emphasis, reducing compounding misconceptions class wide.

Logistics Associate

Aug 2024 – May 2025

The Kitpak

New York, NY

- Coordinated international orders across Windows, macOS, and Shopify, catching cross-platform discrepancies before they reached the shipment stage.
- Diagnosed a bottleneck in the fulfillment workflow and restructured the picking and packing process, resulting in faster turnaround on high-volume days without sacrificing accuracy.

IT Helpdesk Technician

Aug 2022 – May 2023

Kingsborough Community College

Brooklyn, NY

- Resolved 20–40 hardware and software support tickets daily for a 20,000+ person campus, maintaining same-day close rates and keeping escalations low.
- Traced recurring Microsoft Outlook failures to a shared misconfiguration pattern and applied a systematic fix, eliminating repeat tickets across affected accounts.

PROJECTS

Calisigh | Desktop App | React, Tauri, Rust, Spark Java, JavaScript

2025

<https://github.com/Marged4/calisigh>

- Architected a multi-layer desktop calendar: React frontend, Tauri/Rust shell for OS integration, and a Java Spark REST backend; packaged as a Windows installer (v1.1.5) distributed to 5 external users.
- Embedded a local Llama 3.2 (via Ollama) as a context-aware scheduling assistant, running AI features entirely on-device with zero external API calls or data transmission.

Diva FFMPEG | Rust TUI Wrapper | Rust, Ratatui, Charmed-Lipgloss

2026

<https://github.com/Marged4/divaffmpeg>

- Built a text-based terminal user interface in Rust using Ratatui and ASCII art to provide user-friendly interaction with FFMpeg.
- Enabled users to convert, merge, trim, compress, and apply filters to various media files.

Popular Vote | Full-Stack Web App | React, Node.js, PostgreSQL, Socket.io, Supabase, Gemini API, Google OAuth

2026

<https://github.com/Marged4/popularvote>

- Built a live Q&A platform with real-time WebSocket delivery and role-based host/participant architecture; validated stability underload with 40 simultaneous users joined via QR code.
- Integrated Gemini 2.5 Flash to cluster questions by semantic theme, reducing duplicate responses; coordinated development across a 3-person Agile team mentored by a senior Shopify engineer.

SolveSudoku | Full-Stack Web App | React, Vite, Python, Flask, Gemini API, PIL

2026

<https://sudoku.marged.it>

- Developed a browser-based Sudoku platform with puzzle generation, constraint-based solving, validation, and an AI hint system; built a photo-to-puzzle pipeline using Gemini 2.5 Flash and PIL.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Rust, SQL**Databases:** MySQL, PostgreSQL**Frameworks:** React, Node.js (Express), Flask, Tauri, Spark Java**Tools:** Git, GitHub, VS Code, Maven, Cargo, Vite
